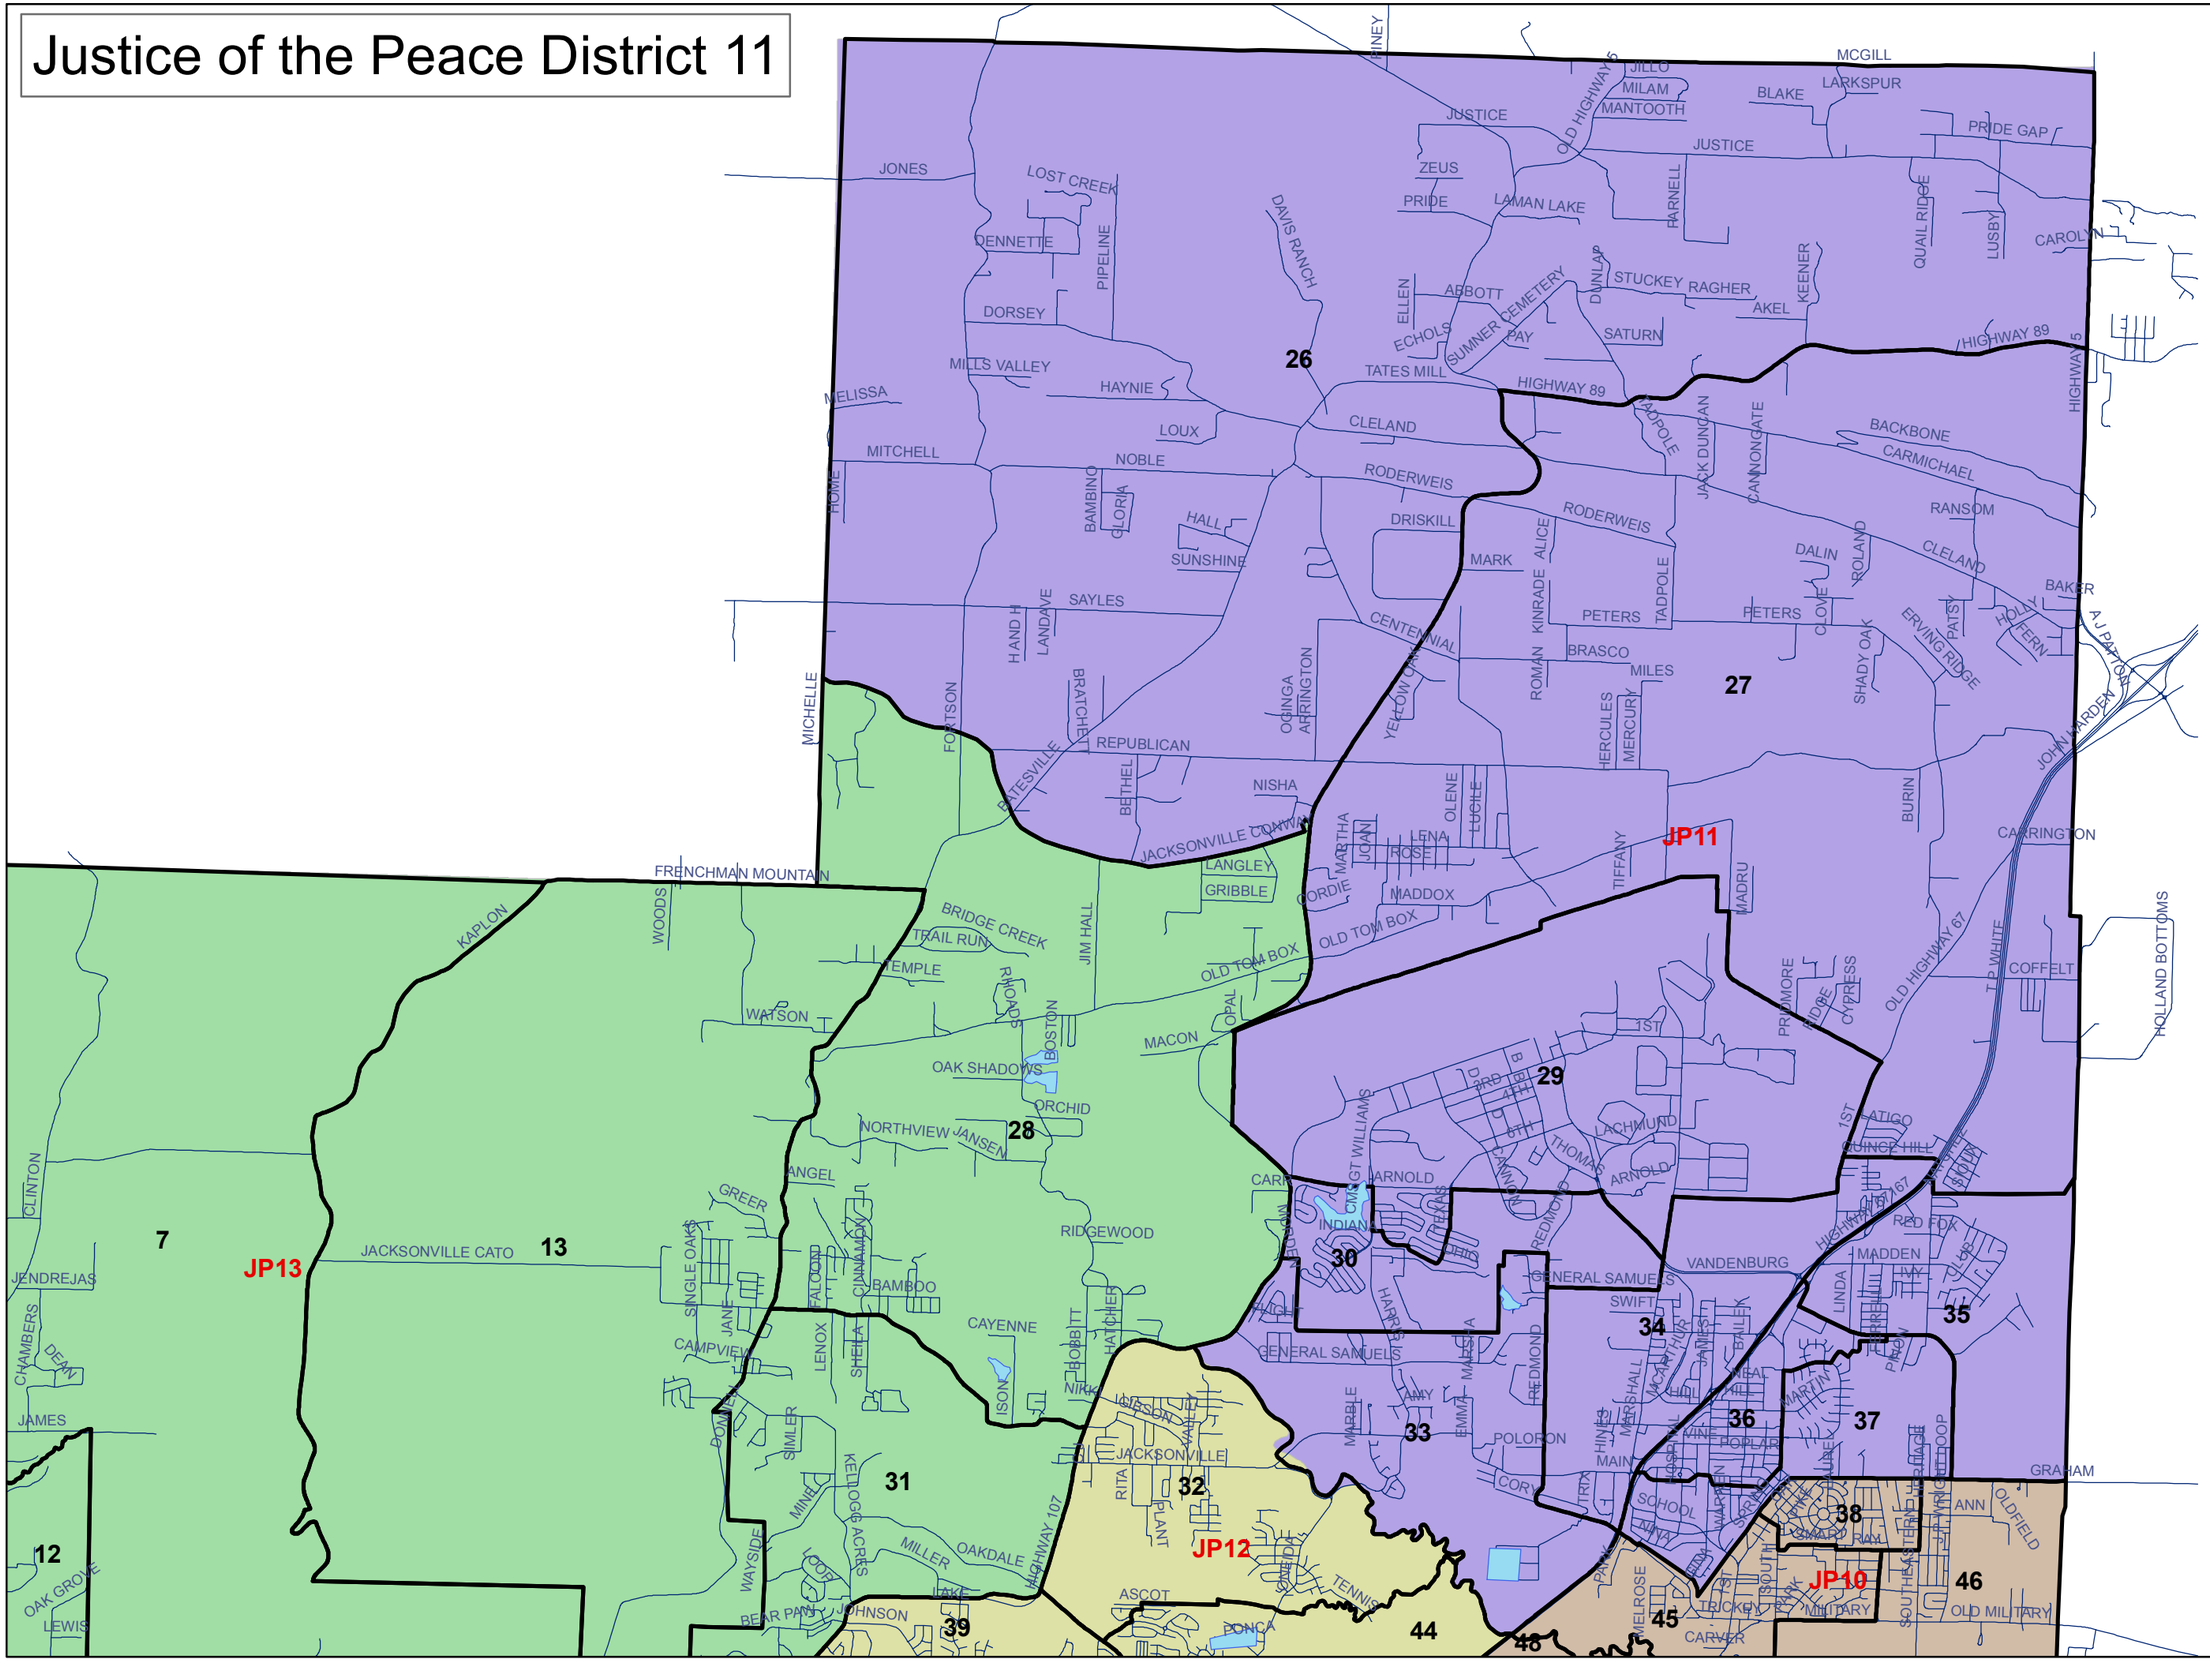
Justice of the Peace District 11



The information provided to you by the Pulaski County Election Commission (hereinafter "PCECC") was compiled from various sources and should not be considered authoritative for engineering, surveying, legal and/or other uses. Information obtained from the use of this map should not be used for property boundary resolution.
The maps and data provided by the PCECC are considered "as is" without warranty or any representation of accuracy, timeliness or completeness. The maps and associated data we have provided do not represent a survey.
To the extent permitted by law, the PCECC and its member agencies shall not be liable for any claims, actions, costs or damages of any nature, asserted by the user or by another rising from the use of the data.
Any use of the maps, images, data or content provided by the PCECC is at the sole risk of the user, and, by proceeding, user does hereby agree to indemnify and hold harmless the PCECC and its member agencies from any and all claims, actions, costs or damages of any nature, asserted by the user or by another rising from the use of such data.
The PCECC provides no warranties, expressed or implied, concerning the accuracy, completeness or reliability or suitability of this data for any other particular use. Furthermore, The PCECC and its member agencies assume no liability whatsoever associated with the use or misuse of such data.
The data may have an inherited number of errors which may include but are not limited to the following types of errors:
a) Spatial errors - The areas depicted by these maps are approximate, and are not necessarily accurate to surveying or engineering standards. XY coordinates may be in error by several feet or more.
b) Registration errors - GIS data layers may not overlay each other correctly.
c) Attribute errors - Database information may be incorrect.
d) Currency errors - GIS data layers may not be current. Data input lags real-world changes by varying periods of time.
e) Completeness errors - Data layers may be missing or data may be included that does not belong.
f) Projection distortion - All map projections introduce distortion by representing the irregular shape of the earth's surface on flat maps. This affects feature shapes and map distances.
