State Senate District 33

The information provided to you by the Pulaski County Election Commission (hereinafter "PCEEC") was compiled from various sources and should not be considered authoritative for engineering, surveying, legal and/or other uses. Information obtained from the use of this map should not be used for property boundary resolution.
The maps and data provided by the PCEEC are considered "as is" without warranty or any representation of accuracy, timeliness or completeness. The maps and associated data we have provided do not represent a survey.
Any use of the maps, images, data or content provided by the PCEEC is at the sole risk of the user; and, by proceeding, user does hereby agree to indemnify and hold harmless the PCEEC and the member agencies from any and all claims, actions, costs or damages of any nature, asserted by the user or by another rising from the use of the data.
The user acknowledges and accepts all inherent limitations of the maps and data, including the fact that the maps and data are dynamic and in a constant state of maintenance, correction and revision.
The PCEEC provides no warranties, expressed or implied, concerning the accuracy, completeness or reliability or suitability of this data for any other particular use. Furthermore, The PCEEC and its member agencies assume no liability whatsoever associated with the use or misuse of such data.
The data may have an inherited number of errors which may include but are not limited to the following types of errors:
a) Attribute errors - Database information may be incorrect.
b) Registration errors - GIS data layers may not properly align with each other correctly.
c) Currency errors - GIS data layers, databases and documents may not be the most current available or may not depict the specified time. All data is subject to constant change. Data input tags real-world changes by varying periods of time.
d) Completeness errors - Data may be missing or data may be included that does not belong.
e) Completeness errors - All map projections introduce distortion by representing the irregular shape of the earth's surface on flat maps. This affects feature shapes and map distances.
f) Projection distortion - All map projections introduce distortion by representing the irregular shape of the earth's surface on flat maps. This affects feature shapes and map distances.
