

# Justice of the Peace District 15

The information provided to you by the Pulaski County Election Commission (hereinafter "PCEC") was compiled from various sources and should not be considered authoritative for engineering, surveying, legal and/or other uses. Information obtained from the use of this map should not be used for property boundary resolution. The maps and data provided by the PCEC are considered "as is" without warranty, any representation of accuracy, timeliness or completeness. The maps and associated data we have provided do not represent a survey. Any use of the maps, images, data or content provided by the PCEC is at the sole risk of the user, and by proceeding, user does hereby agree to indemnify and hold harmless the PCEC and its member agencies from any and all claims, actions, costs or damages of any nature, asserted by the user or by another arising from the use of the data. The PCEC provides no warranties, expressed or implied, concerning the accuracy, completeness or reliability or suitability of the data for any other particular use. Furthermore, the PCEC and its member agencies assume no liability whatsoever associated with the use or misuse of such data. The data may have an inherent number of errors which may include but are not limited to the following types of errors: a) Attribution errors - Database information may be incorrect, and the map may not be the most current available or may not depict the specified time. All data is subject to constant change. Data input lags real-world changes by varying periods of time. b) Registration errors - GIS data layers may not overlay each other correctly. c) Coordinate errors - Database information may be missing or the map may not be the most current available or may not depict the specified time. All data is subject to constant change. Data input lags real-world changes by varying periods of time. d) Completeness errors - Data may be missing or data may be included that does not belong. e) Projection distortion - All map projections introduce distortion by representing the irregular shape of the earth's surface on flat maps. This affects feature shapes and map distances.
