

# Justice of the Peace District 6

The information provided to you by the Parish, County, Election Commission, Precincts (PCEC) was compiled from various sources and should not be considered authoritative for advertising, campaigning, legal and/or other uses. Information obtained from the use of this map should not be used for property boundary resolution. The map and data provided by the PCEC are considered "as is" without warranty or any representation of accuracy, timeliness or completeness. The map and associated data were provided to you as a service and are not intended to be used for any purpose other than the one intended. Any use of the map, images, data or content provided by the PCEC is at the sole risk of the user, and by proceeding, user does hereby agree to indemnify and hold harmless the PCEC and its member agencies from any and all claims, actions, costs or damages of any nature, asserted by the user or by another arising from the use of the data. The data may have an inherent number of errors, concerning the accuracy, completeness or reliability of this data for any other particular use. Furthermore, the PCEC and its member agencies assume no liability whatsoever associated with the use or misuse of such data. a) Boundary errors - GIS data layers, databases and documents may not be the most current available or may not depict the specified time. All data is subject to constant change. Data input lags real-world changes by varying periods of time. b) Completeness errors - Data may be missing or data may be included that does not belong. c) Attribution errors - GIS data layers, databases and documents may not be the most current available or may not depict the specified time. All data is subject to constant change. Data input lags real-world changes by varying periods of time. d) Currency errors - GIS data layers, databases and documents may not be the most current available or may not depict the specified time. All data is subject to constant change. Data input lags real-world changes by varying periods of time. e) Projection errors - All map projections introduce distortion by representing the irregular shape of the earth's surface on flat maps. This affects feature shapes and map distances. f) Projection distortion - All map projections introduce distortion by representing the irregular shape of the earth's surface on flat maps. This affects feature shapes and map distances.
