

State House District 39

The information provided to you by the Pulaski County Election Commission (hereinafter "PCEC") was compiled from various sources and should not be considered authoritative for engineering, surveying, legal and/or other uses. Information obtained from the use of this map should not be used for property boundary resolution. The maps and data provided by the PCEC are considered "as is" without warranty or any representation of accuracy, timeliness or completeness. The maps and associated data we have provided do not represent a survey. The user acknowledges and accepts all inherent limitations of the maps and data, including the fact that the maps and data are dynamic and in a constant state of maintenance, correction and revision. The PCEC makes no warranty, express or implied, for the use of the maps and data for any purpose other than that for which they were prepared. The user agrees to indemnify and hold the PCEC harmless from any and all claims, actions, costs or damages of any nature, arising from the use of the data. The PCEC makes no warranty, express or implied, for the use of the maps and data for any purpose other than that for which they were prepared. The user agrees to indemnify and hold the PCEC harmless from any and all claims, actions, costs or damages of any nature, arising from the use of the data. The data may have an inherent number of errors which may include but are not limited to the following types of errors:

- a) Spatial errors - The areas depicted by these maps are approximate, and are not necessarily accurate to surveying or engineering standards. XY coordinates may be in error by several feet or more.
- b) Registration errors - GIS data layers may not overlay each other correctly.
- c) Attribution errors - Database information may be incorrect.
- d) Content errors - GIS data layers, databases and documents may not be the most current available or may not depict the specified time. All data is subject to constant change. Data input lags real-world changes by varying periods of time.
- e) Projection distortion - All map projections introduce distortion by representing the irregular shape of the earth's surface on flat maps. This affects feature shapes and map distances.
