The information provided to you by the Little Rock County Election Commission (hereinafter "PCEC") was compiled from various sources and should not be considered authoritative for engineering, surveying, legal analysis, or other purposes. The maps and data provided by the PCEC are considered "as is" without warranty or any representation of accuracy, timeliness or completeness. The maps and associated data we have provided do not represent a survey. The user acknowledges and accepts the inherent limitations of the maps and data, including the fact that the maps and data are dynamic and in a constant state of maintenance, correction and revision. Any use of the maps, data, or information provided by the PCEC is at the sole risk of the user and all claims, actions, costs or damages of any nature, asserted by the user or by another arising from the use of the data, are disclaimed. The PCEC makes no warranty, expressed or implied, concerning the accuracy, completeness or reliability of the data. The data may have an inherent number of errors which may include but are not limited to the following types of errors: a) Spatial errors - The areas depicted on these maps are approximate and are not necessarily accurate to surveying or engineering standards. XY coordinates may be in error by several feet or more. b) Registration errors - GIS data layers may not overlay each other correctly. c) Attribute errors - Database information may be incorrect. d) Currency errors - GIS data layers, databases and documents may not be the most current available or may not depict the specified time. All data is subject to constant change. Data input lags real-world changes at varying periods of time. e) Projection errors - Data may be missing or data may be included that does not belong. f) Projection distortion - All map projections introduce distortion by representing the irregular shape of the earth's surface on a flat map. This affects shapes and map distances.
